

MD HOQUE

NYS Licensed Professional Engineer (P.E.) | ENV SP | US Citizen | NYS Driver's License Holder
Sunnyside, Queens, NY | enam97@gmail.com | +1-347-285-4007
[LinkedIn profile](#) | [Portfolio](#)

Professional Summary:

NYS Licensed Professional Engineer with 20 years of progressive civil engineering, construction management, and public-sector experience, including extensive experience with NYC DDC and NYC Parks. Experienced in construction safety, field inspections, contractor compliance, risk management, performance monitoring, and resolution of complex construction issues. Currently serving as an Administrative Project Manager (Deputy Director) at DDC, supervising five Senior Project Administrators and overseeing approximately 55 capital projects valued at more than \$150 million. Proven leader in developing SOPs, analyzing project performance data, improving operational processes, training staff, and coordinating with contractors, regulatory agencies, and City stakeholders. OSHA 30-Hour and 10-Hour Construction Safety trained, with strong knowledge of construction operations, compliance requirements, and safety practices.

Professional Experience:

20 Years of working experience in the Civil Engineering field as follows:

1. Administrative Project Manager (Deputy Director), (From Aug 13, 2023) **NYC Department of Design & Construction, 30-30 Thomson Avenue, Long Island City, NY 11101.**

Duties/Responsibilities:

Supervising a staff of five Senior Project Administrators; managing approximately 55 sewer, watermain, and roadway capital-funded construction projects that are valued over \$150 million; reviewing and tracking projects from pre-design through the final construction phase; and resolving operational field problems to decrease inconvenience to impacted areas. Additionally, serves as the liaison among DDC, DOT, DEP, and other sponsor and regulatory agencies regarding project scopes, conflicts, troubleshooting, and the resolution of project-related issues that may arise. Updates and maintains all unit reports, including but not limited to MMR, KPI, client outstanding issues, construction quarterly reports, and commitment plan reports. Prepares draft responses for the Commissioner's C-track correspondence and follows up on outstanding issues. Assisting the Borough Director and/or assuming responsibilities for the preparation of documents requested by the Commissioner's Office such as Fact Sheets, Project information summaries, maps, and sketches for Borough President consultations, attending Community Board and Town Hall meetings, interagency coordination meetings, review, coordination, and developing standard operating procedures (SOP), processing RFPs, task orders, force accounts and tracking records with smart spreadsheets, participates in the development and implementation of major agency and division procedures. Additional duties include generating data sheets and scoping sketches for budget consultations, and drafting responses on behalf of the Deputy Commissioner, Associate Commissioner, and Directors per the Commissioner's requests. Also, represents the borough director in their absence.

Achievements:

Efficiently handled all the job responsibilities of a Program Borough Director for over one and a half years and managed a team of five Senior Project Administrators. Developed SOPs for Change Order processing, updated SOPs for Force Account and Task Orders processing, provided one-to-one training to the Sr. Project Administrators, and, with the help of AI tools and VBA code, developed an enterprise-level project information tracking system. Developed a web application using JavaScript coding for task order review

(<https://enamul-sae.github.io/Task-Order-App-v1/>). This has simplified and significantly reduced the overall time of processing this paperwork.

2. Senior Project Administrator/APM 02, (From Jan 18, 2022, to Aug 12, 2023) NYC Department of Design & Construction, 30-30 Thomson Avenue, Long Island City, NY 11101.

Duties/Responsibilities:

Monitor, track progress, identify, and follow up on critical issues through the project scope development, design, and construction phases to ensure projects are on or ahead of the specified schedule; maintain accurate information about the assigned projects in the agency's database or benchmark throughout the project life cycle. Working with Sponsor Agencies from project inception to ensure an understanding of each project's scope and vision, following up on all issues concerning the pre-design and design phase of projects with the appropriate agency personnel; this includes issues such as permits, railroad facilities, property acquisition, project funding, project mapping, the mini RFP process for design and REI services, and participation in meetings regarding the scope development, design, and construction of the projects, including the commitment plan, alignment, and bid opening, pre-award, and pre-construction. Also, manage the preparation of documents for the project, including preparing correspondence during the pre-design, design, and construction phases of the project, notifying the community boards and elected officials on project status, and interacting with client agencies.

Achievements:

Developed advanced tracking spreadsheets for tracking projects, Task Orders, RFPs, Force Accounts, and project folders. This reduces the time required to retrieve information whenever necessary.

3. Resident Engineer/ CPM 02 (From Aug 19, 2018, to Jan 17, 2022) NYC Department of Parks & Recreation, Flushing, NY 11368.

Duties/Responsibilities:

Manages construction work involving multiple partners (e.g., architects, landscape architects, engineers, utility companies, regulatory agencies, contractors, and consultants) on diverse complex capital commitment projects with varying degrees of complexity. monitors the contractors' and consultants' day-to-day operations and directs oversight of construction details. Oversees the approval process of various construction projects, proposals, and reports, including making recommendations to take corrective actions. Generating cost proposals and estimates for contract price negotiations, reviewing, approving, and recommending change orders, coordinating the project's field construction operations, consulting with landscape personnel, architects, and engineers of record, evaluating, and making recommendations on design and redesign modifications of engineering structures, shop drawing approvals, and other architectural and engineering-related issues to ensure the city's infrastructure and project intent are met. Inspecting works to ensure compliance with agency and city policies and standards and provides oversight of contractors to ensure adherence to plans and specifications. Maintained correspondence with contractors, prepared directives to respond to RFIs, reviewed and approved contractors' payment requisitions, and clarified other construction issues. Compile project information accurately to aid in the resolution of field problems, review, and research contractors' dispute claims, and advise the borough director on solutions. Coordinating and supervising a squad of construction interns and providing information to the Design, Utility, and Program Management Units during various stages of construction Collaborate on monitoring various contract administrative requirements (e.g., minority/women business enterprise goals, project labor agreements, damages for delay programs). Updates reports and contractor/subcontractor performance evaluations in the Unifier; prepares, maintains, and keeps updating the calculation books based on actual field data; processes

time extension and overrun requests; prepares cost projections; organizes, conducts, and leads progress meetings. Coordinates for as-builts, tracks, monitors, and processes retainage release payments for construction contractors after maintenance and guarantee inspections. In a word, overseeing each project from inception to the construction completion and close-out of the finished structure.

Project Cost: Two capital projects of average. \$2.75 Million each.

Achievements:

Scheduled and led monthly progress meetings on-site. Effectively collaborated with multiple partners of the project, such as Architects, Consultants, supervisors, technical personnel, regulatory agencies, and utility companies such as Con Edison, Verizon, etc., which reduced budgets, timelines, change orders, and redoing work.

4. Assistant Civil Engineer/CPM I (Oct 1, 2017 – Aug 18, 2018)

NYC Department of Design & Construction, Long Island City, NY 11101.

Duties/Responsibilities:

Performing technical work in the inspection of the NYC street infrastructure system, i.e., construction, repair, or maintenance, and replacement of water mains, sanitary sewers, storm sewers, pavements, and sidewalks. This involves inspecting the grading, paving, and repaving of streets; house sewer connections; retaining walls; and the repair of water, sewer, and utility manholes. Inspecting all contract work to ensure conformance with specification standards and contract drawings. Also responsible for the preparation of the daily progress report, estimation, and checking the contractor's bill as per the completed works, including change orders, according to the line items.

In addition, prepared contract documents, specifications, and final estimates; engaged in engineering investigations and preparing contract plans and working drawings; participated in field surveys of existing conditions and prepared reports; engaged in engineering reviews and studies; and drafted designs with minimal supervision.

Project Cost: Two projects of approx. \$10.00 Million in total.

Achievements:

Minutely monitoring construction activities on site to ensure contractors are adhering to the scope, specification, and other contract documents. This reduced budgets, timelines, and redoing works.

5. Engineering Technician (Jun 26, 2016 – Sep 30, 2017)

NYC Department of Environmental Protection, Flushing, NY 11373.

Duties/Responsibilities:

Conducting programmatic technical inspections of public infrastructures such as catchment and drainage basins for wastewater, cross-connection relay and repair, water, and sewer plug inspections and tests, collection of field data and reporting by using Geographic Information Systems (GIS) Flex Viewer and IPS (Infor Public Sector), and capturing, storing, and analyzing geographical data for future implementation. Participate in field surveys. Prepare drawings and sketches; perform mathematical calculations; and assist in estimating costs, materials, and labor requirements. Engage in research and investigations related to sewer and water main construction, operations, maintenance, and repairs. Assist in the preparation of reports, memos, and

correspondence. Maintain office records of drawings, plans, surveys, and inspection data. Knowledgeable in the collection, treatment, and disposal of wastewater.

Project Cost: \$1.50 Million.

6. Associate Project Manager (March 01, 2012 – December 15, 2013)

Trust Asset Ltd., Uttara, Dhaka.

Duties/Responsibilities:

Reviewing proposed projects to determine how and when the work should be performed. Site survey, review the design, plans, and specifications of the construction, alteration, or repair of buildings to conform to codes and local laws. Review the project budgets and make necessary changes depending on available resources. Preparing Risk Management Plan and practicing. Managed several construction projects, supervised, coordinated, and directed Project Managers, Junior Project Managers, and technical workers, and inspected construction sites to ensure that the construction works were done as per the designs, proper engineering methods were followed, and standard safety measures were taken. Selecting contractors based on their profile, past performances, testimonials, and a sound technical proposal with the best price Corresponding with contractors and clarifying different construction issues arising at the site, Reviewing, making corrections if necessary, and approving contractors' bills. Review, research, and advise solutions to the upper management regarding contractors' dispute claims, working closely with architects, consultants, and customers regarding the design change or modification requested by the customers or change order requests made by the contractors. Getting the architectural and structural drawings approved by government agencies, Implementing and enforcing standard construction safety procedures at the construction sites and monitoring them on a regular basis, preparing work programs, tracking the work progress, suggesting necessary actions in case the project falls behind schedule, and estimating cost projections. Managing development & maintenance of project baseline schedules, risk registers, and cost reports. Calling and running meetings among the different parties involved in the project, keeping records of the decisions being made, and following up.

Project Cost:

Seven 8-story Reinforced Concrete Apartment buildings costing \$2.0 Million each.

Achievements:

Preparing project schedules and proactively monitor project progress and supply chain reduced the risk of project delays. Also, estimating construction cost and price negotiation with contractors, and vendors reduced the project budgets by 15%.

7. Associate Project Manager (May 31, 2009 – February 24, 2012)

The MGT Group, Dubai, UAE

Duties/Responsibilities:

Reviewing Request for Proposals (RFPs) and Solicitations and summarizing important notes and preparing tender documents, including technical proposals, bills of quantities, and generating cost estimates to determine the price at which the project should be bid. Surveying using the theodolite/leveling tool, preparing working drawings by using AutoCAD, preparing risk management plan and ensuring implementation throughout the project lifecycle, site inspection, and providing guidance to the site engineers and technical workers, implementing construction safety procedures, supervise, coordinate, and direct project's design, construction management and construction staff, reviewing the work progress reports from

the site engineers, developing deliverable dates to determine schedules that should be adhered to finish assigned projects in a timely, cost-effective manner, preparing alternative work plan based on the current situation and available resources, planning for the materials, manpower, and machines, Running multiple complex projects concurrently, communicating with consultants to build the projects to the full satisfaction of the customers, Dealing with the sub-contractors, communicating with them to resolve different construction issues and make them adhere to the contract documents and designs being agreed among the parties, checking the change order and bills with the quantity of work being performed by the sub-contractors, and recommending to the management the payments accordingly. Developing project controls guide, Standard Operating Procedures, monitoring and controlling project performance metrics and developing performance improvement strategies.

Project Cost:

A camp of re-locatable buildings (RLBs) of \$6,000,000, two 2-story Office Buildings of RLBs of \$6,00,000, Communication Manholes & Vault Project of \$3,00,000, a runway of size '60 feet X 1000 feet for Tactical Unmanned Aircraft Systems (TUAS) of \$150,000 along with many other projects.

Achievements:

Preparing contract documents including projects schedules, cost estimates, technical proposals and conceptual drawings helped winning construction contract by 25% more. Monitoring projects closely on-site ensuring works being done as per contract documents. This helped to avoid redoing works and complete projects on time and within budget.

8. Construction Project Manager (December 2004 – May 2009)

Ellipse Engineering and Construction Ltd, Dhanmondi, Dhaka.

Duties/Responsibilities:

Preparing tender documents, reviewing the designs and plans, Estimating, Preparing the Bill of Quantity, Preparing the work schedules, Setting up the budget and construction timetable, developing construction strategy, Enforcing standard construction safety procedures at the site, Construction Site surveying, and plotting layout for the excavation of the foundation, Inspection of construction activities and Guidance to the Technical workers & Supervisors of different nationalities to ensure compliance of the design and local codes, Planning with the available Materials & other Resources to make the best use of those items, preparing material requisition to make sure on-time availability of the required materials, technical workers and Machinery, communicating with Consultants and Customers to ensure their technical requirements being fulfilled, Consulting with the Project Director with the work progress and follow guidance to overcome constraints arising at the construction sites.

Project Cost:

Many construction projects like feed mills, multi-storied residential buildings, steel workshops, Foundation works for steel structures, loading dock, steel structure for motor vehicle showrooms, etc., costing over \$3,000,000.

Achievements:

Monitored projects closely on-site, ensuring works were done as per contract documents. This helped to avoid redoing works and complete projects on time and within budget.

Academic Qualification:

- Completed 15 Semester credits in **Master of Science in Water Resources Engineering** from Bangladesh University of Engineering and Technology (BUET) Dhaka, Bangladesh in 2007.
- Bachelor of Science in Civil Engineering, 2004
Bangladesh University of Engineering and Technology (BUET)
Dhaka, Bangladesh.

Carrier development Certification and Trainings:

- Licensed on the Principles and Practice of Engineering (**PE**) exam (Civil/Geotechnical Engineering), under NYS Board of Education, 2020.
- Passed Fundamentals of Engineering (**FE**)/Engineer-in-Training (**EIT**) exam, by NY State Engineering Board.
- Training on concise business writing, December 4, 2024, instructed by New Horizon Training Institute.
- Attended 40 PDH Credit hours of in-person training classes on Project Management Professional (PMP) presented by PMI-authorized training provider Netcom.
- Attended 4 PDH Credit hours of a webinar on design-build project delivery by DBIA.
- Attended 20 PDH Credit hours of webinars on Certified Construction Manager training by CMAA.
- 6 PDH credit hours of Risk Management Training by Arcadis, Jun 21 & 28, 2024.
- Microsoft Excel for Office 365 Level 1 and Level 2 by Netcom, May 8, 2024.
- Engineering Ethics: Professional Ethics for Engineers, by Noon Pi
- Completed Resident Engineer Training and Refresher Course. Topics: Tasks & Responsibilities of a Resident Engineer, Construction Management Tool Unifier, Construction Progress schedule, Construction Meetings, Calculation Books & Payments, DOB procedures, Change Order, overruns, cost projections, Site safety, labor classifications, MWBE, QA issues, Time Extension, Claims & Closeout process etc.
- Completed 16 PDH Credit hours on in-person training on “Fundamentals of Supervision” conducted by NYC DCAS, July 25 & 26, 2023.
- Construction Information Management Software, QCS (Quality Control Systems) of the Resident Management Systems (RMS) - by United States Corps of Engineers (**USACE**).
- Project management software /web applications such as Unifier, Benchmark, CP Tracker, ACCO flow, Task Order, Change Order, Bid Scope Plus, PDMS, etc.
- “Temporary Stockpiling Sites of Excavated Materials” training conducted by NYC DDC.
- Got Training on “**ACI** Concrete Field Test” conducted by Tectonic Engineering & Surveying Consultants P.C., sponsored by NYC DDC, October 2023.
- Licensed OSHA 30-hour Construction Safety and Health training by 360-degree training.
- **OSHA** 10-hour Construction Safety and Health training by NY Safety and Training (02/28/2024).
- Environmental Health and Safety (**EHS**) training by NYC DEP.
- Plumbing Course (Basics) by “Institute of Engineers of Bangladesh” (IEB).

IT Skills:

- Strong skills in Artificial Intelligence (AI) tools such as Microsoft Copilot, ChatGPT, and Claude.

- Strong Professional skills in **Microsoft Office** (Word, Excel, PowerPoint), Microsoft Projects, Microsoft Outlook, Microsoft Teams, and Microsoft Visio.
- Professional skills in project management applications such as Benchmark and Unifier.
- Professional skills in **Auto CAD**
- **Professional skills in PDF** editor software (Phantom PDF, Nitro PDF, Adobe Professional PDF).
- Intermediate skills in **Staad Pro** and **ETABS**.
- Basic skills in Photoshop, 3D rendering using 3D Studio Max.
- Intermediate skills in **ArcGIS/IPS (Infor Public Sector)**.

Other Skills:

- Excellent supervisory experience, verbal & written communication, technical writing, organization, and presentation skills.
- Project planning, organizing, collaborating, managing, and creating work programs using Microsoft Projects.
- Performs field inspections to check the progress or completion of projects and ensure that the works are done as per the contract documents including approved design, best engineering methods being applied, and standard safety procedures being followed.
- Assist the supervisor in preparing Contract Specifications, project Cost Estimates, Work Orders, and Requisitions. Reviews and negotiates costs with contractors & vendors, processes change orders, and overruns.
- Knowledgeable of current and up-to-date engineering methods and standard practices.
- Work closely with the Architects, consultants, and Clients in a compliant manner, reviewing the submittals, designs, specifications, and drawings, obtaining approvals from government agencies, and making a proper plan for the project activities.
- Highly skilled in compliance monitoring. Keeps daily logs to track inspection findings. Great ability to read schematics and plans.
- Preparing Risk Management Plan and planning for the Materials, Manpower, and machinery to ensure efficient supply chain management for on-time delivery of the projects. Competent in managing multiple running projects simultaneously.
- Preparing tender documents, bills of Materials, and technical proposals based on the scope of works and technical specifications and solicitation. Preparing SOW for the sub-contractors, reviewing their submittals, and selecting the best contractor based on different factors including their past performance, technical documents, organizational chart, etc.
- Managing subcontractors to ensure their compliance with the contract documents, reviewing change orders, overruns, and invoices for completed work, and recommending payments to upper management. Scheduling and Conducting review and progress meetings with subcontractors and keeping a record of the decision/outcome and follow-up.
- Prepares reports and recommendations of field inspections and investigations relevant to assigned work and maintains status records of all projects. Prepares and submits periodic progress reports on projects and reports on all project-related issues that may impact the scope of work, schedule, and cost of projects.
- Fieldwork, studies, research, review, and investigation capabilities of new civil engineering concepts to resolve engineering issues associated with the projects and find out the root cause of such issues, reporting the summary of the investigation and giving recommendations.
- Prepare and submit various permit applications and obtain permits for different project-related issues

from different government regulatory agencies.

Language Proficiency:

- English (Medium of education, professional skills in Oral & Written)
- Bengali (Native/Bilingual)
- Hindi (Fluent speaking)
- Urdu (Fluent speaking)
